Downloading R and RStudio:
R – you must do this first

1) Download R from this website: https://cran.rstudio.com/
   Click on the download link for your specific platform (i.e. "**Download R for Windows**" (or Mac))
2) On the right-hand side of the screen click on "**install R for first time**"
3) On the top of the next page click on "**Download R 4.0.3 for Windows**" (or Mac)
4) Run the installer and follow all instructions

*** Do this step to update R even if you already have it. We should all have the most up to date version

RStudio – install this second
1) **R must be installed first.** Double click on the R icon and open it to make sure that it opens. Then close it.
2) Download RStudio here: https://www.rstudio.com/products/rstudio/download/
   Scroll to the bottom and click on the appropriate platform for your computer under "**Installers for Supported Platforms**"
3) Follow installation instructions
4) Open RStudio

*** If you already have Rstudio, update it to have the same version as everyone in the class. (RStudio 1.4.1103)
